Professional Summary

Results-driven Computer Science undergraduate with hands-on experience in end-to-end data engineering, ETL pipeline development, and cloud data platforms (Azure, Microsoft Fabric). Proficient in Python, SQL, and Pandas for large-scale data extraction, transformation, validation, and loading. Eager to design scalable data solutions and contribute to data-driven decision-making in fast-paced environments.

Education

CMR Institute of Technology <i>Bachelor of Engineering – Computer Science and Engineering</i>	2022 – 2026 <i>Bengaluru, Karnataka</i>
Ambika PU College <i>Pre-University – Science (PCMB)</i>	2020 – 2022 <i>Puttur, Karnataka</i>

Experience

NeoStats <i>Data Engineer Intern</i>	2025 – Present <i>Bengaluru, Karnataka</i>
- Designed and maintained ETL pipelines in Python and SQL for structured datasets, automating data cleaning, transformation, and incremental loading across multiple data sources. - Orchestrated data integration workflows using Azure Data Factory and Microsoft Fabric, reducing manual processing effort and improving pipeline reliability. - Implemented automated data validation and quality checks, ensuring accuracy, consistency, and reliability of analytical datasets. - Collaborated with cross-functional teams to support analytics workflows, delivering clean and well-documented datasets for downstream reporting.	

Technical Skills

Programming: Python, SQL	Data Engineering: ETL/ELT, PySpark, Data Pipelines
Data Processing: Data Cleaning, Preprocessing, Data Validation	Data Modeling: Star Schema, Medallion Architecture, Incremental & Full Load
Cloud Platforms: Azure, Microsoft Fabric	Azure Services: Azure Data Factory, Azure Logic Apps
Data Visualization: Power BI, DAX	Data Tools: Microsoft Excel, Google Sheets
Frameworks & Libraries: Pandas, NumPy, NLTK, Flask	Version Control: Git, GitHub, GitLab
Other Tools: MS Office, Jupyter Notebook	Soft Skills: Communication, Teamwork, Leadership, Problem-Solving

Projects

NeoStats Retail Data Engineering <i>Python, Pandas, Power BI, DAX</i>  Repository	2025
- Built an end-to-end Retail Sales Analytics Platform using a Bronze–Silver–Gold medallion architecture, ingesting ~8,400 raw records and producing curated KPI marts with Python (Pandas) and Power BI (DAX). - Engineered a vectorised ETL pipeline for data cleaning, deduplication, and PII masking, producing a validated Silver fact table of 7,914 rows across 19 columns. - Materialised four Gold-layer KPI aggregations (category, city, product, payment) and built a five-page Power BI dashboard with a comprehensive DAX measure layer.	
Airbnb Sentiment Analysis <i>Python, NLTK, VADER</i>  Repository	Dec 2025
- Developed a sentiment analysis pipeline classifying Airbnb reviews into positive, neutral, and negative categories using VADER polarity scores ($[-1, 1]$) and Python NLP techniques. - Cleaned and preprocessed review datasets, resolving missing values and inconsistencies to improve classification accuracy for downstream analysis. - Visualised sentiment distribution trends and generated actionable insights to identify key factors driving positive and negative guest experiences.	

Certifications

Microsoft Certified: Fabric Data Engineer Associate – Microsoft	Aug 2026
Personal Growth & Leadership – McKinsey Forward	Jul 2025
Prompt Engineering – Columbia University (Coursera)	May 2025
Database and SQL Fundamentals – Infosys Springboard	May 2023

Additional

Activities & Leadership
- Attended Bangalore Tech Summit 2024, exploring AI, Cloud Computing, and Data Engineering industry trends. - NSS volunteer – organised digital-literacy drives and exam-awareness sessions, coordinating with local stakeholders. - Active Cricket and Volleyball player, demonstrating teamwork, discipline, and competitive drive.
